Forecast for Tuesday 12 Nov 2024

Weather: Largely clear skies with isolated fog and frost patches overnight, clearing in the morning. Tuesday will be dry again with bright or sunny spells and patchy areas of cloud. Feeling rather cold on the tops in a moderate northeasterly breeze.

Chance of cloud-free hill tops above 800m: 95%.

Low Cloud and visibility: Very good or excellent visibility with extensive views from the hills. Any early fog patches in the valleys should soon disperse.

Meteorologist's View

Nothing to add.

Forecast for Wednesday 13 Nov 2024

Weather: Overnight fog patches in the valleys will gradually disperse in the morning. Dry through daylight hours with bright or sunny spells, turning cloudier from the north through the evening, perhaps with the odd spot of light rain or drizzle later.

Maximum wind: Northeast 15-20mph.

Chance of cloud-free hill tops above 800m: Near 100% through daylight hours, perhaps reducing to 30% towards midnight.

Low Cloud and visibility: Summits generally cloud free through daylight hours. Through the evening cloud spreading from the north with bases reducing to around 600m later. Generally very good visibility through daylight hours, but likely to reduce to poor at times across summits through the evening, especially in any patches of light rain or drizzle.

Temperature: **Valleys:** Plus 2 Celsius, rising to Plus 8 Celsius.
At 800m: Plus 1 Celsius rising to Plus 4 Celsius
Freezing level: Above summits.
